3. Publications most closely related to the proposed project

Sector Management in New England's Groundfish Fishery: Dramatic Change Spurs Innovation. GMRI, Aug. 2012.

4. Synergistic activity

- (1) 2009 – 2012 – convener of Monitoring Working Group; a joint NOAA/fishing industry body that developed guidelines for dockside and at-sea monitoring programs for groundfish sectors.
- (2) 2009 – 2012 – convened sector manager meetings, bringing managers of New England's groundfish sectors together
- (3) 2009 – 2010 – convened group to determine equitable distribution of federal funds for dockside monitoring expenses and sector operational costs
- (4) 2009 – present – collaborate with NMFS and fishing industry leaders to implement sector management in the groundfish fishery and convene to identify and address design improvements, such as monitoring and reporting.
